

Please do not allow a small group of businesses to infringe upon, or dictate my freedom of choice as to what i can or cannot receive over my paid subscription to satellite. They do so not in the interest of my freedoms, or to improve the quality of their own products, but solely to inhibit competition, so that they may line their own pockets at the expense of my right to choose. I pay for this service. If their product worked better for me, perhaps I would have chosen it. Instead, they attempt to usurp my right to choose at all. Is this what a free market is all about?

If my legislators vote to inhibit my personal right to choose my own broadcast content and choices, then I can assure you that I shall remember the gesture on election day, and I will be sure to exercise my rights to their fullest extent at the polls.

Thank you.
